The web page which we are working on is https://myanimelist.net/ . Here users can watch anime, read manga, see details like when, where they released, their members amount, ranking. We scraped the same data with 3 different scraping tool, Beautiful Soup, Scrapy, Selenium, which contains, name of Anime, its score, rank, popularity members, date and channel. Each tool is going through the pages, take above mentioned data from each link of anime list.

1. Gahraman Akbarov worked with Beautiful Soup.
